

MAITREYA LTD.

Kálvária tér 2., H-1089 Budapest ✕ HUNGARY

Date: 24 November 2010

To: The German Speaking SCIO User Community

Re: The activation of the software

I would like to take this opportunity to remind you of following facts to help you in your proper usage of your SCIO Universal Electrophysiological Biofeedback System (SCIO).

Maitreya Kft. (in English called Maitreya Ltd.) is commonly called the Budapest Home Office (BHO) and is the manufacturer of the SCIO with a CE Mark registration that includes the box, Instructions for Use (in English, German, French, Romanian and Hungarian), the harnesses as shown in the User Manual, and the Clasp32 English and German software.

To officially register your SCIO, you can go to our website www.qxsubspace.com and create your account which links to your serial number. Please note that our SCIOs begin with Serial Number SX. With your registered account, you can download, install and activate the Clasp32 English software. Alternatively, if you wish to activate the Clasp32 German software then you can contact Wellness Trust AG based in Kreuzlingen, Switzerland on www.wellness-trust.com as they are authorized to activate the Clasp32 German software for their customers. Currently we are working on new developments to the Clasp32 software which will be a revision of the newest and latest in energetic medicine. We keep regular contact with our customers through www.qxsubspace.com by sending out automatic emails and Newsletters. It is always best to be working with the latest version of the software due to the fact that revisions of the software are best built on the previous version.

The price of the SCIO is set throughout the world at 15,000 EUR. Our Contracted World Brokers are listed on our website www.qxsubspace.com under Representatives. They are listed by Country or by company name.

If you have any questions please contact Wellness Trust AG via their website www.wellness-trust.com or the Budapest Home Office via our website www.qxsubspace.com.

Best regards,

Richard Lloyd
Regulatory Manager
